

We need a food system transformation – in the face of the Ukraine war, now more than ever

The Ukraine crisis exposes the fact that our current ways of producing and consuming food are unsustainable and unjust. In response, we should reinforce – and not abandon – the transformation towards a healthy, just, and environmentally-friendly food system. We need comprehensive solutions that bring relief in the short term and at the same time avert the existential threat our food system poses to the health of people and the planet.

Russia's invasion of Ukraine has created a humanitarian catastrophe, while simultaneously disrupting global energy systems and the world's agricultural markets. Ukraine and Russia are major global producers of wheat, maize, and oilseeds as well as fertilizer and fuel. Exports are likely to be severely disrupted due to the war. The Middle East and Africa are highly dependent on imported grain from the area and will be most affected. Soaring grain prices could push millions of people in these regions into poverty and hunger. As an immediate reaction, policy-makers should ensure open agricultural trade flows and adequate financial support for international food aid programmes.

The anticipated shocks to agricultural markets have also prompted short-sighted suggestions like abandoning sustainable agricultural practices that form part of the EU's Farm2Fork strategy, and increasing Europe's grain production capacities, partly to secure animal feed supply. These measures would not move us towards but further away from a reliable food system that is resilient to future shocks, and delivers healthy and sustainable diets.

Transforming today's food systems to ensure food security

Global food insecurity has its origin not in a shortage of supply, but in high economic inequalities and maldistribution. Today's global food production is more than sufficient to feed an even higher world population. However, grains are fed to animals, used as biofuels, or wasted rather than supplied to those with limited financial means¹.

Contrary to what ongoing discussions might imply, European food security is not under threat from the Ukraine crisis. Rather, Europe is threatened by a long-standing crisis of unhealthy diets with consumption of refined grains and animal products markedly above the recommendations of national dietary guidelines and those for healthy and sustainable diets².

Here we propose three levers for coping with the short-term shocks to the food system while also ensuring human health and long-term sustainable development.

1. Accelerate the shift towards healthier diets with less animal products in Europe (and other high-income countries). A shift towards higher human consumption of legumes, vegetables and fruits, and less animal products in Europe could substantially alleviate pressure on global grain supplies. One-third of global calories are currently used to feed animals³ and more than three-quarters of agricultural land are used to produce

³Cassidy et al. (2013).

animal-source foods⁴. Based on FAO data, we estimate that reducing the EU's use of grains to feed livestock by about one-third could compensate for the collapse of Ukrainian exports of grains and oilseeds⁵.

Concurrent reductions in the consumption and production of animal-source foods would lead to a more balanced food and agricultural system in line with health and environmental targets⁶. Drastically reducing consumption of animal-source foods is a prerequisite for limiting global warming to well below 2°C⁷, halting the continuous destruction and pollution of natural habitats, and thus stopping agriculture's transgression of planetary boundaries⁸. Furthermore, a shift towards predominantly plant-based diets could prevent 11 million premature deaths each year and substantially lower the global burden of disease⁹.

Conversely, political efforts to allocate further land to feed production with the aim of stabilizing livestock capacities within the current crisis are counterproductive to global food security. These efforts increase the feed-food competition and delay the transformation towards more sustainable food production.

2. Increase production of legumes and strengthen Farm2Fork. European agriculture heavily depends on energy-intensive nitrogen fertilizers. Supplies are currently interrupted as Russia is one of the world's largest producers of fertilizers and natural gas. The Farm2Fork strategy, which aims at halving nitrogen surplus and expanding organic agriculture on 25% of the land, would largely reduce this import dependency. Increasing diversity in crop rotations by including nitrogen-fixing legumes could replace synthetic fertilizer by biological fixation¹⁰. Improving nitrogen use efficiency by better dosing and timing of synthetic and organic fertilizers would further reduce imports, and would also result in enormous benefits to climate, air quality, and water quality. In addition, implementing the Farm2Fork strategy rapidly would improve soil quality and strengthen biodiversity in agricultural landscapes, thereby ensuring long-term food security through preserving ecosystem services.

Political efforts to abandon the sustainability targets of the Farm2Fork strategy (including greenhouse gas emission reduction, reduction of nitrogen fertilizer and pesticide use, and protection of fallow land for biodiversity) do not shield us from the current crisis, they rather worsen it and make the crisis permanent. Global warming and ecosystem decline are already affecting crop yields and livelihoods worldwide, a situation that will substantially deteriorate in the absence of ambitious mitigation strategies¹¹.

3. Reduce the amount of food waste. According to our calculations, the amount of wheat wasted in the EU is approximately half the amount of Ukraine's wheat exports and a quarter of other grain exports¹². Efforts to reduce food waste along the value chains from retailers to

¹²According to the FAO, 25% of grains in the EU are wasted in households. We combined this with estimates of EU's demand for wheat, which according to FAOSTAT was 47 Mt in 2019, and compared it to Ukrainian wheat exports, which according to FAOSTAT was 21 Mt in 2019.

private homes could thus reduce short-term pressures on global markets. Food waste does not only contribute to the maldistribution of food supplies, it is also responsible for a large share of our food system's environmental footprint, as 30% of food produced is wasted at different stages of production and consumption¹³. Halving the amount of food waste worldwide by 2030 is therefore also an integral part to align the food system with the Sustainable Development Goals and stay within planetary boundaries¹⁴. Policy-measures have so far failed to adequately address this issue.

It's time to act – to ensure global food security today and a livable future

We have presented three levers to address the current food crisis while keeping long-term sustainability goals in mind. In addition to these overarching strategies, further short-term actions by European governments should be taken to ensure that vulnerable people in poor, food-importing countries do not fall into food insecurity. These actions include providing funds to the World Food Programme to purchase grains and keeping trade open, including food trade to and from Russia. Furthermore, social-security systems and food banks need to be strengthened across the EU to avoid detrimental effects of rising food prices for poor households. Effective long-term action however needs to tackle the inequalities of the current food system, in which hunger, waste, and resource-intensive consumption patterns coexist.

Russia's invasion of Ukraine and the ongoing war have sent shock waves through the food system. How the current crisis is handled politically has far-reaching implications for each one of us. The recently published IPCC report states that there is only a short window of opportunity left for effective action in the face of accelerating climate change and other environmental crises¹⁵. Focusing on short-term solutions now without considering the longer-term consequences or integrating the wider picture exacerbates future risks including the threat of surpassing critical tipping points of our planet's natural systems. Investing in a transition towards healthy and sustainable food systems now is essential to increase our resilience against future crises and ensure a safe and livable planet for generations to come.

187. Prof. Dr. a.D. Alois Heißenhuber, Agricultural Economics and Farm Management, Technische Universität München-Weihenstephan
188. Dr. Raphaël Manlay, AgroParisTech, Montpellier, France
189. Prof. Dr. Bernhard Schauburger, University of Applied Sciences Weihenstephan-Triesdorf & Potsdam Institute for Climate Impacts Research (PIK)
190. Dr. Philippe Grandcolas, Director, Institut de Systématique, Evolution et Biodiversité, Muséum national d'Histoire naturelle, CNRS, Sorbonne Université, EPHE, UA, CP50, 57 rue Cuvier, 75005 Paris, France
191. Dr. Vivian Valencia, Assistant Professor, Farming Systems Ecology, Wageningen University and Research, The Netherlands
192. Dr. Silvia De Monte, IBENS, PSL Research University, Paris, France and Max Planck Institute for Evolutionary Biology, Plön, Germany
193. Dr. Olivier Jaillon, CEA, Genoscope, Evry, France
194. Dr. Sabrina Schulz, Executive Director, Sustainable Development Solutions Network (SDSN) Germany
195. Dr. Jeroen Candel, Associate Professor of Food and Agricultural Policy, Wageningen University, the Netherlands.
196. Dr. Chantal Le Mouél, French National Research Institute on Agriculture, Food and Environment, Rennes, France.
197. Dr. Tomáš Václavík, Associate Professor, Department of Ecology and Environmental Sciences, Palacký university Olomouc, Czech Republic
198. Dr. Josette Garnier, Research Director CNRS, Metis 7619, Sorbonne Université, Paris, France
199. Dr. Christoph Schmitz, Founder and Managing Director of Acker e.V., Bessemerstr. 2-14, 12103 Berlin
200. Dr. Ulrich Kreidenweis, Leibniz Institute for Agricultural Engineering and Bioeconomy (ATB), Potsdam, Germany.
201. Dr. Patricia Genet, Professor assistant, Institute of ecology and environmental sciences of Paris, Université Paris Cité, France

202. Dr. Dilini Abeygunawardane, Research Associate, Leibniz Institute of Agricultural Development in Transition Economies (IAMO), Halle (Saale), Germany
203. Dr. Friedrich J. Bohn, Helmholtz Centre for Environmental Research - UFZ, Leipzig, Germany
204. Dr Christian Mougín, Research Director, INRAE, ECOSYS, Versailles, France
205. Dr Sarah Jones, Scientist, Alliance of Bioversity International and International Center for Tropical Agroforestry, Montpellier, France
206. Dr. Kati Krähnert, Potsdam Institute for Climate Impact Research (PIK)
207. Dr. François Chiron, Université Paris Saclay, Ecology Systematics Evolution, Orsay, France
208. Dr. Raphaël Antoine, Research Scientist, Centre for Studies on Risks, the Environment, Mobility and Urban Planning (Cerema), Endsum research team, Rouen, France
209. Dr. Fabienne Barataud, Research Engineer, National Research Institute for Agriculture, Food and the Environment (INRAE), Nancy, France
210. Dr Hélène Joly, CIRAD, Crop evolution scientist, research unit AGAP (Plant adaptation and plant breeding), Dynamics of Diversity, Societies and Environment team. Montpellier, France
211. Dr. Sarah Scholze, Center for International Health, LMU Munich
212. Dr Denis Lairon, Emeritus research director at INSERM, Human nutrition team-Sustainable food systems at Cardio-vascular and nutrition research center Inserm-Inrae-AMU, Faculty of medicine, Aix-Marseille University, France
213. Dr. Jean-Michel Olivier, research engineer CNRS, UMR CNRS 5023-LEHNA, University of Lyon France
214. Dr Manon Fallet, Postdoctoral researcher at MTM Research Center, Örebro University, Sweden
215. Prof. Michael Bonsall, University of Oxford, United Kingdom.
216. Jérôme Belliard, Research Engineer, National Research Institute for Agriculture, Food and the Environment (INRAE), HYCAR RU, Antony, France
217. Dr. Gabrielle Bouleau, Research Scientist, National Research Institute for Agriculture, Food and the Environment (INRAE), Champs-sur-Marne, France
218. Catherine Donnars, Research Engineer, French National Research Institute for Agriculture, Food and Environment, Paris, France.
219. Dr. Emmanuelle Kesse-Guyot, Senior Researcher, INRAE, France.
220. Dr Timothée Cook, Science Officer at BlueSeeds, Darwin Ecosystem, Bordeaux, France
221. Dr Thierry Desjardins, IRD, Paris, France
222. Dr. Ing. Martin Seidl, Senior researcher, LEESU ENPC, Champs/Marne, France
223. Dr. Anja Hansen, Leibniz Institute for Agricultural Engineering and Bioeconomy (ATB), Potsdam, Germany.
224. Dr. Alberto Sanz-Cobena, Associate Professor at the Research Center for the Management of Agricultural and Environmental Risks (CEIGRAM) of the Universidad Politécnica de Madrid (UPM, Spain).
225. Jun.Prof. Dr. Antje Risius, Professur Ernährung Gesundheit und Nachhaltigkeit, Pädagogische Hochschule Schwäbisch Gmünd/Universität Göttingen (Germany)
226. Dr. Christine Hatté, researcher at the Laboratoire des Sciences du Climat et de l'Environnement (Gif-sur-Yvette, France) and associate professor at the Silesian University of Technology (Gliwice, Poland)

227. Dr Thomas Pugh, Senior Lecturer, Lund University, Sweden.
228. Dr Jan Ellenberger, Researcher at the Institute of Crop Science and Resource Conservation, University of Bonn, Germany.
229. Carmen Klinger, PhD Candidate, Ludwigs-Maximilians-Universität (LMU) München
230. Pierre-Alain Jayet, DR INRAE (National research institute for agriculture, food and environment)
231. Pr. Jean-Marie Mouchel, Sorbonne Université, Paris.
232. Thomas Puech, Research Engineer, National Research Institute for Agriculture, Food and the Environment (INRAE), Mirecourt, France
233. Mr. Olav Kjørven, Senior Director of Strategy, EAT Foundation, Oslo, Norway
234. Dr. Gesa Maschkowski, Federal Centre for Nutrition, Bonn, Germany.
Scientists4Future Bonn
235. Masihullah HASANYAR, Doctorant, Mines ParisTech, Fontainebleau, France
236. Dr. Kai Kornhuber, Lamont-Doherty Earth Observatory, Columbia University, NYC
237. Dr. Agnès Rivièrè, researcher at Mines ParisTech, PSL University, Paris, France
238. Dr. Michel Meybeck, Senior scientist, CNRS, Sorbonne Université, Paris, France
239. Ivanka Puigdueta Bartolomé, MSc in Environmental Sciences, Research Centre for the Management of Agricultural and Environmental Risks (CEIGRAM), Spain
240. Dr. Carmen Bessa Gomes, Associate Professor, AgroParisTech, Paris, France
241. Dr. Niels Debonne, postdoctoral researcher, Swiss Federal Research Institute WSL and VU Amsterdam, Switzerland/the Netherlands
242. Dr. Christian Levers, Assistant Professor, Vrije Universiteit Amsterdam, The Netherlands
243. Marie Aureille, PhD Candidate, Ecole des Hautes Etudes en Sciences Sociales, Paris, France
244. Dr Thierry Desjardins, IRD, Paris, France
245. Dr. Rasmus Einarsson, Postdoctoral researcher at the Research Center for the Management of Agricultural and Environmental Risks (CEIGRAM), Universidad Politècnica de Madrid (UPM), Spain
246. Prof Pete Smith FRS, FRSE, Professor of Soils & Global Change, University of Aberdeen, Scotland, UK
247. Dr. François Bonhomme, Directeur de recherches émérite, Université de Montpellier, France
248. Dr. Hervé Philippe, Directeur de recherche, Station d'Écologie Théorique et Expérimentale, UAR CNRS 2029
249. Dr. Yasmina Boussafir, Ingénieure, Université Gustave Eiffel, Département Géotechnique Environnement Risques naturels Sciences de la terre, campus Marne-la-Vallée, France
250. Bram Droppers, PhD, Wageningen University, Wageningen, The Netherlands
251. Dr. Pietro Barbieri, Associate Professor, Bordeaux Sciences Agro, Bordeaux, France.
252. Dr. Michael Hagenlocher, Associate Academic Officer, United Nations University, Institute for Environment and Human Security (UNU-EHS), Bonn, Germany
253. Dr. Amanda Wendt, Climate Change and Health Working Group, Potsdam Institute for Climate Impact Research (PIK), Potsdam, Germany
254. Dr. Yue Dou, Assistant professor, Natural Resource Department, Faculty of Geoinformation Science and Earth Observation, University of Twente, the Netherlands

255. Dr. Julie Augustin, Postdoctoral researcher, French Agricultural Research Center for International Development (CIRAD)
256. Dr. Janine Pelikan, Deputy Director, Thünen Institute of Market Analysis.
257. Dr. Julia Baudry, researcher, INRAE, France
258. Bea Bardusch, researcher at Thünen Institute of Market Analysis.
259. Dr. Marco Heinrich, researcher at Thünen Institute of Market Analysis
260. Prof. Dr. Martin Banse, Director, Thünen Institute of Market Analysis
261. Dr. Felicitas Schneider, researcher at Thünen Institute of Market Analysis, Germany
262. Dr. Josef Efken, researcher at Thünen Institute of Market Analysis, Germany
263. Dr. Sebastian Brandis, Speaker of the Board, Stiftung Menschen für Menschen-Karlheinz Böhms Äthiopienhilfe
264. Dr. Anthony Fardet, Research Scientist, National Research Institute for Agriculture, Food and the Environment (INRAE), Clermont-Ferrand/Theix, France
265. Dr Marko Kerac, Associate Professor, London School of Hygiene & Tropical Medicine, UK
266. Dr. Meredith Jackson-deGraffenried, Global Technical Advisor, Helen Keller Intl, Malawi
267. Dr Clotilde Biard, Associate Professor, Sorbonne Université, Institute of Ecology and Environmental Sciences IEES-Paris, Paris, France
268. Dr Rémi Tournebize, Postdoc, Instituto Gulbenkian de Ciência, Oeiras, Portugal
269. Fabian Jacobs, Institute of Medical Education, University Hospital, LMU Munich, Munich, Germany
270. Dr. Ivica Faletar, Researcher at Thünen Institute of Market Analysis, Germany
271. Dr. Julio G. Fournier Gabela, researcher at Thünen Institute of Market Analysis, Germany
272. Dr. Pierre Dupraz, Research Director, National Research Institute for Agriculture, Food and the Environment (INRAE), Rennes, France
273. Dr. and Prof. Emeritus Gerald C. Nelson, University of Illinois, Urbana-Champaign, United States
274. Dr. David Kilian, researcher at Thünen Institute of Market Analysis, Germany
275. Dr Laurent Penet, researcher, National Research Institute for Agriculture, Food and the Environment (INRAE), Petit Bourg, Guadeloupe
276. Elizabeth Zehner, Director, Assessment and Research on Child Feeding Project, Helen Keller International (ARCH), Washington, D.C., USA
277. Dr Vincent Daubin, CNRS, Laboratoire de Biométrie et Biologie Evolutive, Université de Lyon, France
278. Dr. Felix Herzog, Agroscope, Zurich, Switzerland
279. Dr. Julien Tournebize, Senior Researcher, National Research Institute for Agriculture, Food and the Environment (INRAE), HYCAR UR, Antony, France.
280. Dr. Michael Krawinkel, Prof. em., Justus-Liebig-University, Giessen, Germany
281. Dr Patrick A. Jansen, Associate professor, Wildlife Ecology and Conservation group, Wageningen University, The Netherlands.
282. Dr Jean Humphrey, Professor, Human Nutrition. Johns Hopkins Bloomberg School of Public Health, Baltimore, MD, USA.
283. Prof Dr. Thomas Nesme, Univ Bordeaux and INRAE, Bordeaux, France
284. Dr. Sam S. Rabin, Rutgers University, USA
285. PD Dr. Philipp Grundmann, Leibniz-Institute for Agricultural Engineering and Bioeconomy (ATB) and Humboldt Universität zu Berlin, Germany

286. Prof Ian Hamilton, UCL Energy Institute, University College London, UK
287. Dr. Daniela Weible, researcher, Thünen-Institute of Market Analysis
288. Prof. dr. Roos Vonk, Radboud University, Behavioral Sciences Institute, The Netherlands
289. Dr. Bruno Dorin, Researcher (economics), Cirad/Cired, Paris, France
290. Kenneth A. Meter, MPA, President of Crossroads Resource Center, USA
291. Henk Folmer. Professor of Spatial Economics, University of Groningen, The Netherlands, Professor of Spatial Statistics, Padjadjaran University, Bandung, Indonesia, Founder and first president of the European Association of Environmental and Resource Economics
292. Joel Guiot, emeritus CNRS, CEREGE, Aix-Marseille University, Aix-en-Provence, France
293. Prof. dr. Pim Martens, Maastricht University, The Netherlands
294. Dr. Carsten Meyer, German Centre for Integrative Biodiversity Research (iDiv) Halle-Jena-Leipzig, Germany
295. Prof. dr. Jeltsje van der Meer-Kooistra, University of Groningen, The Netherlands
296. Dr. Žiga Malek, Vrije Universiteit Amsterdam, the Netherlands
297. Dr. ir. Ignas M.A. Heitkönig, Wildlife Ecology and Conservation group, Wageningen University, The Netherlands.
298. Prof. Dr Theunis Piersma, Rudi Drent Chair in Global Flyway Ecology, GELIFES, University of Groningen & senior research scientist NIOZ Royal Netherlands Institute for Sea Research
299. Emeritus Professor Robert Gottlieb, Occidental College, Los Angeles
300. Dr. Jeanne Nel, Programme Lead: Biodiversity Environment, Wageningen University & Research, the Netherlands
301. Prof. dr Liesje Mommer; Plant Ecology and Nature Conservation; Leader of the Wageningen Biodiversity Initiative; Wageningen University & Research, the Netherlands
